

Environmental Policy

At Element International, we recognize our responsibility to minimize environmental impact while delivering innovative packaging solutions. As a wholesaler of patented FIBCs designed for the mining, chemical, food, and agricultural sectors, we integrate sustainability into every aspect of our operations.

Our commitments include:

- Promoting and supplying 100% recyclable FIBCs that enable circular raw material usage in client operations.
- Encouraging partners and suppliers to meet environmental standards aligned with ISO 14001.
- Reducing our office footprint through:
 - Digital documentation and reduced paper use.
 - Energy-efficient lighting and electronic equipment.
 - Responsible disposal of ink cartridges and e-waste.
- Promoting remote work to reduce commuting emissions.

We continuously evaluate our environmental impact and actively seek opportunities to improve performance while supporting customers in meeting their sustainability goals.
